ELECTRIC SCOOTER

ELECTRIC SCOOTER

The Maserati Electric Scooter is project in co-branding with LEXGO. This partnership combines the Maserati's DNA such as world top ranking performance, design and quality with the state-of-the-art technology on E-Mobility.

Each Maserati Electric Scooter is developed as a unique and distinctive product with an own identity and style.

All product features and innovations are the result of the R&D of LEXGO, aiming in a positive impact on design and performances, resulting in a comfortable and performing ride.

The Maserati Electric Scooters are equipped with high-end electronics, and assembled with high quality components of premium materials, aiming to be the top-ranking e-mobility device of this industry, with a clear Maserati spirit.

HIGH END COMPONENTS & INNOVATIONS

HYDRAULIC BRAKES

High-performance dual hydraulic disc brakes, equipped with power-cut function, enhance best efficiency and safety for riding experience.

SMART DISPLAY

Large size color display, malfunction diagnosis and icon, odometer for single ride and accumulated ride, speed mode and cruise control, give all data for you to know about the journey.

SMART HELMET

Practical application scenarios such as phone answering, cycling navigation, music playback, volume control, song control, light control, L/R turning control etc during the riding, give a comprehensive safe riding control, with the first innovative eco-system connection between your vehicle and smart helmet.

Apple Find My

The Apple Find My network provides an easy, secure way to locate Maserati vehicles on a map using the Find My app on your iPhone, iPad, iPod touch, or Mac.
